Make The Inquiry

Advertised goods are the ones that move with the least sales effort on the part of the dealer.

In fact, they sell themselves. If you don't think so, ask your wife or the girl what kind of goods she buys.

Nine times out of ten you will have her come back with the name of some well-advertised brand.

You will find that a mighty percentage of buying is done on the name alone, for people realize that they cannot be experts in judging the quality of various kinds of merchandise, and consequently depend upon the reputation of the manufacturer.

The public has learned that no advertiser can long survive unless his product is up to the standard he declares it to be.

DAIRYMEN'S ASSOCIATION FORMING

Dairymen who have been looking forward to the organizing of a new Dairy Herd Improvement or Cow Testing Association in this vicinity, will be interested to know that active work has been started. A committee consisting of Austin P. Stearns, Jr., County Dairy Project Leader; Ernest Talbot, and W. G. Knightly, met at the Farm Bureau Office, Saturday afternoon and held over plans for the organization and made out a list of dairymen whom they plan to get in touch with to see who is interested.

If you are interested and are not called upon by one of the committee within the next two weeks, the committee will feel it a favor if you will call them up or write to them and tell them you would like to know more about it. Dairy Project Leaders in each of the other communities are making a similar survey and a prospective list of members will soon be compiled.

Chief Justice Albert R. Savage

Article No. 10, by C. F. Whitman
The first time I saw Judge Albert R. Savage was at a term of the Supreme Judicial Court in Ansonia. It was in the early eighties of the last century. He was then the county attorney. Some strikers from one of the factories had been indicted for interfering with laborers who had taken their places and wanted the work. The indicted men employed Ben Butler as their counsel, General Butler had no real defense to make for his clients, and knew it. I have forgotten much of the details of the case, but if I remember correctly, the indicted strikers had assaulted some of the workmen whom they called "scabs." I never saw such a crowd around a court house as had gathered outside, waiting for the court house doors to be opened. Lawyers and favored ones were let in by a rear entrance. I recall looking out of a window and seeing a long line of men reaching out of sight down towards the bridge, across the Androscoggin River. Judge Thomas H. Haskell, who was holding the court, soon came out of the library room, followed by County Attorney Savage, General Butler and several lawyers. They all seemed more or less afraid of the General. When the doors were opened to the spectators, such was the pressure behind the front ones, they were fairly bounced in and in a few minutes the court house was quickly occupied. Savage, addressing the court, said that with its consent, he had made arrangements with the strikers' counsel for them to get the personal recognition for their appearance when called for, but in case they made no further trouble for the men, who had taken their places, the cases might be dismissed. General Butler then addressed the court, stating, as I remember, that such a disposition of the matter would be best for all parties. While he was speaking, he showed the Judge great deference, but I could not resist the feeling that the General was the big man and the Judge the small one. Of course the court acquiesced in the arrangement, as everyone knew he would.

Later I was introduced to the General by Judge Nahun Morrill, but as he was cross-eyed, I was not sure that he really looked at me.

There was a fellow whom I knew by the name of Daggett, who got a good job by taking one of the strikers' place and I was glad for him. I thought then and I haven't changed my mind to this day—that if one man or a set of men won't work for what an employer can afford to pay, he or they have a right to quit and in that case they should stay quit and go about their business and should not interfere in any way with the employer or his workmen. The "picketing" business has always been abhorrent to me as an infringement of personal rights, and in my judgment it will some time not be tolerated by the courts. There has been much talk by would-be lawless elements about the abuse of injunctions by the courts but all such authority exercised by judges that ever came under my notice, resulted in good. It's always best to put out a fire when it's being kindled.

Judge Savage was born in Byegate, Vermont, December 8, 1847. His father's family, removed, some years after, to a farm in Lancaster, N. H., where he fitted for college at Lancaster Academy and graduated at Dartmouth in 1871. For a short time, he taught school in New Hampshire and Vermont, then he began the study of the law for a profession and was admitted to practice at Montpelier, Vt., in 1874. In 1875, he removed to Ansonia, Me., where he at once took a leading position at the Androscoggin County bar. Besides being county attorney, he was speaker of the Maine House of Representatives, President of the Senate, Mayor of the City of Ansonia, and Judge of the Probate. He was appointed Judge of the Supreme Judicial Court in May, 1897, and Chief Justice in 1913.

Woodworth and Bates Colleges conferred upon him the degree of L. D. He died suddenly while serving as Chief Justice and was succeeded by Judge Leslie C. Cornish of Augusta, a splendid judicial officer and a most likable man. It is noteworthy that he too died while holding the position of Chief Justice.

I very much liked Judge Savage and it is with considerable reluctance that two of his decisions are here criticized. A fellow was prosecuted in this county for a violation of the liquor laws. He was defended by Judge Danch Foster, after he had retired from the bench and resumed the practice of the law in Portland. It appeared upon the trial of the case that the respondent had bought the liquor in question—not sold it. But Judge Savage ruled that he had aided the seller to violate the law and was therefore guilty. He stated that the jury was bound to accept his ruling and it rendered a verdict for the state. Judge Foster carried the case to the full court and obtained a decision in favor of his client. And this has been the law of the land from time immemorial. The Supreme Court of the United States, within a recent period, has re-affirmed the principle and it's likely to remain as a leading feature of individual rights. To try to enforce a law by unusual and unwise methods would be very likely to result in its repeal. Persons of impracticable ideas should be kept out of legislative bodies, but unfortunately they are not and many foolish measures are enacted into laws, many of which may be found in the statutes of the State.

Some years ago two Oxford County citizens, J. Melvin Bartlett of Stoneham, and Bertrand G. McIntire of Waterford, and now of Norway, were candidates of their respective parties for the office of sheriff. The party to which Mr. Bartlett belonged—except a short period in Greenback times—has been in a great majority in this county for over seventy years, but when dissatisfaction arises over the doings of some of a sheriff's underlings, a big block of voters of the majority party are pretty apt to vote for the opposition candidate, provided he is an able person. And this has happened at the time when these two citizens were soliciting the people for their votes. The election was very close—the result depending upon a very few votes, so close in fact that the matter was carried to court to determine which one was elected. I had an opportunity to examine all of the disputed ballots and while there was some queer marking, it was very clear to my mind that the intention of the majority of the voters of such ballots was in favor of Mr. McIntire and that he should have the office.

Judge Savage heard the parties at the court house, but went home, taking the disputed ballots with him, without rendering a decision. The Judge came into the clerk's office a few minutes before he went away and while there, George O. Bisbee entered. He asked if the Judge could give any encouragement to the friends of Mr. Bartlett. Judge Savage replied that he had come to no decision and that after he got home he should look the disputed ballots over carefully again and in a day or two, send his decision up to me (the clerk). Mr. Bisbee thereupon went out. I thought that Mr. Bisbee (I believe he was not a counsel in the case) should not have said what he did and I said that Mr. Bisbee was not a wise counselor where a political matter was concerned. Of course the Judge made no

reply to this. In a few days, Judge Savage returned the disputed ballots with his decision which was in favor of Mr. Bartlett. At the next election, Mr. McIntire was elected sheriff—the majority of the people of the county feeling that he had been unjustly counted out. He made a good official. He was afterwards the candidate of his party for Representative to Congress and Governor.

I have always believed that had Mr. McIntire been awarded the office of sheriff when he was first a candidate, Mr. Bartlett would have won at the next election.

And I may here say, though it is no reflection on that sheriff case, that the policy of depriving a man of the office to which he has been elected, is a very unwise one, as was seen in the Presidential election of 1876, when Samuel J. Tilden, who had been legally elected, was deprived of his office by a hokus-pokus constitutional committee.

OXFORD—FORE STREET

If anything could warm the cold heart of age, it might be the cheering sight of youth represented on this street. There is Oscar Twichell, son of A. E. Twichell, who cuts wood in the woods and hands it by the horse lead to add to his grandfather's pile, E. E. being nearly used up with neuritis this winter and under the doctor's care, and then Oscar does the same act for his father's aunt Flora, his great aunt, and is piling up wood by her shed door for the saving of the scene of action but young Albert, son of Leon Twichell. Leon, you'll remember, is the man crippled by paralysis, with his two sons of young steers proudly hauling in load after load of ice for his grandfather's ice house. He has gotten the ice his father needed for the coming year hauled, which is no mean lot, as they put in plenty to keep things clean and cool in their summer wayside store, as well as for family use. These boys are yet school boys just turned 14, but school is closed on account of sickness and though they both have had their sick days with sore throats, aches and pains, and yet are coughing, they keep busy when some might be snow-shoveling, skiing, coasting or playing at other sports, loved by boys of this age.

Flora Cummings, who recently returned home, was called away again, returning the 11th and taken ill the 15th, just getting out again the 18th, feeling rather rocky, but coming "O. K."

John Grover is in the hospital with a sore heel. The heel was hurt months ago but John was too busy a man to stop to have it attended to.

"Mike" Reynolds is ill in bed and first one child, then another, as are the children of the other families all along the way. The powerful looking snow plow nester this way on its way to and from Portland and Paris, keeping a good quick way open for the doctor, as well as others, to pass, thanks be, yet autos with their roof and collisions take place, as we see by the wrecking machines as first one and then another auto is reared up on it on their way for repairs at some garage. Sometimes, even in these days, haste makes waste.

We don't lay claims of its being the hottest here on Oxford Fore Street in summer or the coldest place in the country in winter, will leave that for the places where the correspondents may not care so much what they say, but this we do claim: "It's cold, too cold, when the thermometer registers 30 degrees below zero as it has of a morning thus far in the season and we won't deny but those who might be in California are right when they look in the glass and cry "Thot too!"

George F. Hill of Norway is the man who owns the wood and lumber in the Smith pasture, piled all along the way near the cement road. John Grover's teams are hauling it from Hill's mills and men from Norway are stacking it. You stop and listen a minute and you hear the hum of the wood saw just over the way eastward, where this is saved out.

The new cabin erected by the cemetery is a rest and recreation room for the men. It is nice and warm when lunch time comes and quick comfort these cold frosty days when a fellow's hands are nearly chilled and wind blowing so no one could light a pipe or cigarette outside. So what's the wonder that the men's voices are loud and gay in song and laughter as they are about their work, with a place like this to resort to?

My eyes serve me right, John Grover has returned home since I began this scribble, and is driving his truck.

The Clarks, who are away "loving," were at their home here a few minutes, Sunday, Jan. 20. They tell us all is well

with them, though the wind here has raised the roof from some of these buildings during their absence.

School commenced Monday, January 21, after being closed a week because of the teacher being ill and so many of the children were sick.

Mrs. Packard of Noble's Corner, Norway has been caring for Mrs. W. Twichell. She has returned to her home as Mrs. Twichell is on the gain and able to be up around the house.

A. D. Cummings, Margaret and two sons were in Brunswick, Sunday. Irwin returned home with them.

Flora Cummings has been ill this week with the prevailing distemper.

Mrs. Arthur Thompson and children are sick.

On Wednesday morning, Jan. 16, as Myron Lord and wife were working on the night shift, the axle of their car broke and they were obliged to leave the car near the town farm road and walk the remaining distance to the flat, carrying a five gallon can of gasoline—for the back roads where the tractor was working are a long way from a gas tank. They reached the flat at 3 a. m., not a pleasant walk with the thermometer twenty-six degrees below zero. The men walked up Percy Kimball, who obligingly "cranked up" and carried the men in search of the tractor, which they found on the Blackguard road, stalled for want of gasoline. The drivers were chilled and very glad to see the relief party with the gasoline.

We saw a beautiful gray squirrel in the trees in Merritt Savin's yard, recently. He was taking an air line through the tree tops, making long, graceful leaps from one tree to another. He would run on a branch as far as he could, then make a leap to the next tree. Two big maples were on each side of the road and he tried to make the leap from one to the other, but it was too great a distance and he fell out of sight up the road. Who would want to shoot such happy creatures? Surely there must be small enjoyment in doing so.

Luxury Evolution vs. Nec

By Frank E. Mitchell, At

The things our forefathers did seem wonderful; but it is marvelous to consider the things they did without. Only by giving due weight to this are we able to measure their accomplishments.

They had no surfaced roads, no graded schools or public libraries. Telephones, electric lights, automobiles and tractors, these were unheard of. Why, it is but a few days since the first railroad was built. The best transportation known to the democratic wagon and the stage coach, our fathers was supplied by the ox-team. A two-wheel chaise was a sporty vehicle, only used by doctors and gentlemen of wealth.

Our forefathers arose with the sun, reckoned time by it, having marks on their doorposts to show when high noon arrived, and their labors ceased only when the sun had disappeared behind the western hills. Their daylight saving consisted of making the best possible use of time.

Clocks were an imported luxury that only the rich could afford. The dollar watch, the radio, the movie—these they

BRYANT POND

Buildings Burned—Schools Re-opened—Much Sickness in Town—Grange Meeting.

Saturday evening the buildings of John Paakkonen were consumed by fire. The livestock was saved from the barn, but the hens, about seventy-five in number, were burned. The dog was also burned. Some of the household furniture was saved. A few neighbors were able to get there but the fire had got a great headway before help arrived. This used to be the home owned by C. H. Whitman, later owned by his sons, Fred and Elvira. The Paakkonen family stayed at the home of G. W. Q. Perham Saturday night. He moved Sunday to the Frank P. Cole place. There was an insurance of \$2,500.

Crawford of Houlton, Overseer of the State Grange, in a very able manner. He was assisted by Mrs. Crawford, Pomona of the State Grange. Sunday services of the 20th were well cared for by Deacon C. P. Kimball and pastor's wife, Mrs. A. W. Young, as the pastor had some cold it was thought best he remain at home. Deacon took responsive reading, scripture lesson and prayer and Mrs. Young read a short sermon. Sunday school was well attended.

The Christian Endeavor meeting was of such character to be well held to these present. The 27th the pastor expects to bring the people in the morning at 10:30 a message of what prayer is. What it has done and is doing. We hope to be largely free from colds by Sunday and all back to work again in all of the church services.

This community was deeply shocked by the sudden death of Samuel Russ at the home of his granddaughter, Mrs. Robert Johnson, Jan. 21st. Mr. Russ had been well with the exception of a cold and had been about the house as usual. Death was due to heart failure.

Mr. Russ was born in Woodstock and had always lived here. He married Sybil J. Felt, who passed away several years ago. To this union one daughter, Isabel Inez Russ, was born. She married Charles Adams and had two children, Russell and Sybil Adams.

She afterwards married Guy Homingway and passed away a few years ago. Mr. Russ is survived by two grandchildren, Russell Adams of Providence, R. I., and Mrs. Robert Johnson of Bryant Pond, also five great grandchildren, one brother, Henry Russ, of Bethel; one sister, Mrs. Nellie Briggs, of North Edgecomb, also several nieces and nephews and cousins.

Mr. Russ was a member of Franklin Grange, K. of P., and I. O. O. F. He had been representative to legislature and selectman of the town. Mr. Russ would have been ninety years old had he lived until April 24th. He had a wonderful memory and it was such pleasure his friends could call and see him and have a pleasant chat with him. Mr. Russ was also of very keen intellect and was a man very much liked by all that knew him. The funeral was held at the Baptist church at 2 o'clock Wednesday afternoon.

Our Trip To Aroostook County

Caribou to Presque Isle

(Continued from issue of November 23)

It was Saturday night in Caribou and our hotel was serving delicious baked beans, the real thing with pork. Although 300 miles from Caribou, we realized we were among Maine folks but in a country strangely different from the Oxford hills.

We doubt if a better hotel than the Vaughan House can be found north of Bangor. Splendid rooms, a good table and reasonable prices. Caribou is fortunate to have such a good hotel but we were soon to find out that Caribou was full of good things.

It was only a short distance from our hotel to the business section. After supper in the early evening we walked out on the main street. As far as one could see there was one solid mass of automobiles, parked as closely as possible on both sides of the street. Traffic cops were on every corner, crowd the town of Washburn to Presque Isle where we were to make our last real visit in Aroostook.
